SUMMARY

Computer Engineering student at NMIMS Navi Mumbai with proven project experience in AI, distributed systems, and cloud computing. Skilled in Python, Java, and modern data frameworks, with certifications in cloud, ethical hacking, and data analysis. Published research accepted at ICEET 2025 and fluent in five languages. Interested in driving technical innovation through impactful engineering projects.[click here](#).

EDUCATION

Year	Degree	Institution/Board	Grade/Result
2022–2026	Bachelor of Technology	NMIMS Navi Mumbai	GPA: 2.97/4.0
2022	Class 12th	Pace Junior Science College, Maharashtra State Board	62.17 %
2020	Class 10th	Bal Bharati Public School, CBSE Board	88.88 %

CERTIFICATIONS

• AWS Cloud Practitioner Essentials	Jul’ 25
• No-code Machine Learning and Generative AI on AWS	Jul’ 25
• Tableau Certified Data Analyst Training Beginner Course	Jun’ 25
• Ethical Hacking Essentials Course	Apr’ 25

PROJECTS

Distributed Stock Market Alert System: Feb’ 25 – Apr’ 25
Real-time stock alerting platform

Designed a real-time distributed stock alert system using Kafka, Redis, Docker, and FastAPI with yfinance for live data ingestion. Modularized services to streamline data streaming, triggered alerts, and enabled dynamic rule configuration via a lightweight API.

Music Composer Using Genetic Algorithm: Sep’ 24 – Oct’ 24
Interactive revolutionary music generator

Designed an AI music composer using Python, Streamlit, Mido, and Pygame, allowing users to select scale, key, tempo, and instrument. Applied genetic algorithms to evolve melodies, played them in real time, and visualized improvements across generations.

Interactive Flight Booking App using Java and Firebase Sep’ 24 – Oct’ 24
Designed a flight booking Android app using Java, XML, and Firebase with features for user registration, flight search, and seat selection via an interactive layout. Integrated real time updates for seat availability and user data to streamline booking and enhance user experience.

Live Disaster Management Portal Aug’24 – Oct’ 24
Designed a real-time Disaster Management System using Django, MySQL, and Leaflet.js with live data scraping every 30 seconds. Integrated dynamic, color-coded maps and searchable shelter info into an interactive UI for effective disaster visualization.

PUBLICATIONS

Gaganchandra Reddy Gollapalli, Nipun Patil, Aum Pradhan, Asha Rawat.
Real-Time Spatio-Temporal Routing for Hyper-Localized Mobile Advertising in Dynamic Urban Networks.
Proc. of the 11th International Conference on Engineering and Emerging Technologies (ICEET),
22–23 October 2025, Kuala Lumpur, Malaysia.
Status: Accepted for presentation.

SKILLS

- **Core Languages:** Python, Java, HTML
 - **OS:** Windows
 - **Other Known Languages:** C++, CSS
- **Software:** Tableau, Docker, Excel
 - **Databases:** PostgreSQL, Firebase, Redis
 - **Framework:** Django, FastAPI

LANGUAGES

English (C2) Hindi (C2) Telugu (C2)
French (A1) Japanese (A1)
